PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

## Office Action Summary

Application No.

10/798,177

Applicant(s)

GODLEY, HECTOR STUART

Examiner

Meseker Takele

Art Unit

2109

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 11 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-32 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-32 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 11 March 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/08)  
Paper No(s)/Mail Date 04/15/2004.
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1- 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wynn et al. (US Patent No.: 6,667,751) in view of Chailleux (US Pub No., 2005/0278629).

As to claim 1, Wynn discloses, method of capturing Internet Web screens (example, browser computer, web browser, see column 3, lines 11-14 and figure 3), comprising:

a. providing a browser plug-in program with a graphical user interface (example, graphical user interface ("GUI") display on a browser computer, see column 3, lines 11-12);

b. using a standard browsers history of universal resource locator addresses as source of the browser plug-in program (example, universal resource locator ("URL") in the location bar, see column 4, lines 22-24) ;

c. creating screen shots from the standard browsers history of the most recently viewed Internet Web screens (example, screen shot files, see column 10, line, 67);

However Wynn does not disclose, d. enabling searching and viewing of the screen shots within a screen shot file, and e. providing function for the editing of said screen shots into common formats that can produce presentations.

Chailleux from the same field of endeavor disclose d. enabling searching and viewing of the screen shots within a screen shot file (example, screenshots readily accessed, view can also be made visible, see page 5, paragraph [0070]) and [0071], and e. providing function for the editing of said screen shots into common formats that can produce presentations (example, editing arrangement of the slides, screenshots of the information as the basis for creating a presentation, edit view for editing see page 2, paragraph [0016], page 3, paragraph [0041] and page 5, paragraph [0072]).

It would have been obvious to one of ordinary skill in the art to have modify Linear's web browser history viewer at the time of the invention is made with the features of viewing of the screen shots within a file and editing the screen shot for presentation as taught by chailleux, because combining these two references will help a user with a web browser can quickly obtain a presentation from the internet and play back the presentation instantly (see Chailleux abstract).

As to claims 2 and 18, Wynn discloses, wherein said browser plug-in program can be written for any standard browsers (example, standard browser, column, 6 lines, 8-9) see figure 13).

Art Unit: 2109

As to claims 3 and 19, Wynn discloses, wherein said browser plug-in program creates a graphical user interface window from which all functions are executed (example, GUI see page 3, line 2 and figure 3).

As to claims 4 and 20, Wynn discloses, wherein said plug-in program creates a screen shot of each said universal resource locator addresses using said graphical user interface to present to a user (example, URL's and addresses contained within the history log, see page 6, lines, 22-23).

As to claims 5 and 21, Wynn discloses, wherein said plug-in program provides function to search for saved said universal resource locator address and text contained within said screen shots (example, web address selected from the history file, sorting of the history log, store, see column 6, line, 42, 59-60 and figure 13).

As to claims 6 and 22, Chailleux discloses, wherein said plugin program provides function to relocate said screen shots into a difference sequence for developing a presentation (example, Slides can be moved, slides can also be imported into the list and main views so that previously acquired screenshots, pre-made graphics, photographs, etc. can be incorporated into the sequence for presentation See page 3, paragraph [0046] and page 5, paragraph [0072].

As to claims 7 and 23, Chailleux discloses, wherein function is provided to edit text withing each said screen shot (example, Individual slides can be selected, brought into an edit view for editing, see page 5, paragraph [0072] and slides along with animations, text and other features for playback at a later time, see, page 3, paragraph [0046]).

Art Unit: 2109

As to claims 8 and 24, Chailleux discloses, wherein function is provided to edit all graphics within each said screen shot (example, Individual slides can be selected, brought into an edit view for editing, see page 5, paragraph [0072] and slides along with animations, text and other features for playback at a later time, see, page 3, paragraph [0046]).

As to claims 9 and 25, Wynn discloses wherein hyperlinks are preserved in each said screen shot to allow them to work as originally created (example, HTML document, See figure 5).

As to claims 10 and 26, Chailleux discloses, wherein a new hyperlink is created and placed at the bottom of each said screen shot to enable a user to click on it and be able to return to a calling screen (example, Buttons immediately below, and above (not shown) the slide number at 202 move forward, and backward, respectively, within the slide sequence. The button at 204 can be depressed to return to the main view. See page 5, paragraph [0075].

As to claims 11 and 27, Chailleux discloses, wherein said screen shots can be edited and placed into separate files for development of a presentation (example, creating a presentation sequence, "open" a new file, see page 4, paragraph [0060].

As to claims 12 and 28, Chailleux discloses wherein said files can be saved and provide an archive of an Internet Web session (example, files have the extension ".leelou"., the name of the Leelou file to which the screenshots will be stored, see page 4, paragraph [0060] and [0065].

Art Unit: 2109

As to claims 13 and 29, Chailleux discloses wherein said presentation can be shown as a set of slides by using a slide show function provided in said plugin program (Each screenshot is a slide in the presentation, see page 2, paragraph [0016] and figure 6 and 7).

As to claims 14 and 30, Chailleux discloses wherein said screen shot file can be saved and shared on a network for common access to said screen shots (example, use with any network, see page, 2 paragraph [0052] and figure 2).

As to claims 15 and 31, Wynn discloses wherein hyperlinks contained in said screen shots are saved (example, images of the pages viewed are rendered and stored in the system's memory on the system disk, and are keyed to entries in the web browser's history log, see column, 6 lines, 29-31).

As to claims 16 and 32, Wynn discloses wherein a new hyperlink to link back to said Internet Web screen that it was called from is created (example, the user must click the browser's "back" button to return to displaying the parent page if desired, see page 2, lines, 48-60).

As to claim 17, Wynn discloses, method of capturing Internet Web screens (example, higher-bandwidth means such as T1 and T3 data lines, see page, 2 line, 22), comprising:

- a. a means providing a browser plugin program (example, means, see page, 2 line, 15 and figure 1) with a graphical user interface (example, graphical user interface ("GUI") display on a browser computer, see column 3, lines 11-12);

Art Unit: 2109

b. a means using a standard browsers history of universal resource locator addresses as source of the browser plug-in program (example, universal resource locator ("URL") in the location bar, see column 4, lines 22-24);

c. a means creating screen shots from the standard browsers history of the most recently viewed Internet Web screens (example, screen shot files, see column 10, line, 67);

However Wynn does not disclose, d. enabling searching and viewing of the screen shots within a screen shot file, and e. providing function for the editing of said screen shots into common formats that can produce presentations.

Chailleux from the same field of endeavor disclose d. enabling searching and viewing of the screen shots within a screen shot file (example, screenshots readily accessed, view can also be made visible, see page 5, paragraph [0070]) and [0071], and e. a means (example, higher-bandwidth means such as T1 and T3 data lines, see page, 2 line, 22) providing function for the editing of said screen shots into common formats that can produce presentations (example, editing arrangement of the slides, screenshots of the information as the basis for creating a presentation, edit view for editing see page 2, paragraph [0016], page 3, paragraph [0041] and page 5, paragraph [0072].

It would have been obvious to one of ordinary skill in the art to have modify Linear's web browser history viewer at the time of the invention is made with the features of viewing of the screen shots within a file and editing the screen shot for presentation as taught by chailleux, because combining these two references will help a user with a web browser can quickly obtain a

Art Unit: 2109

presentation from the internet and play back the presentation instantly (see Chailleux abstract).

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant disclosure.

Ingrassia, Jr. et al. (US Patent No.: 6,035,332) is cited to teach Method for monitoring user interactions with web pages from web server using data and command lists for maintaining information visited and issued by participants.

Hancock (US Patent No.: 7,165,218) is cited to teach System and method for managing web page media.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Meseker Takele whose telephone number is (571) 270-1653. The examiner can normally be reached on Monday - Friday 7:30AM- 5:00PM est.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Xiao Wu can be reached on (571) 272-2100. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
